## Is communication easy for your customers?

If easy communication can't take place, the **effects on your business could be severe.**

### Why should you improve your customer contact paths?

Conversations through safety screens at banks, post offices and other customer facing businesses are not effective without a system to aid them.

With the help of open duplex technology, speech can be transferred effectively through obstacles such as glazed partitions, meaning your customers and staff are guaranteed the best communication experience.

## How does technology transform interaction in your organisation?

The components of a **quality speech transfer system** include an amplifier designed for optimum performance, high-quality speakers and well-positioned microphones, so that your customers and staff can **converse both freely and flawlessly**.

## Find out the benefits of our speech transfer systems

- Unique multi-positional **noise cancelling microphone** for staff
- Range of options available to meet your needs for performance, positioning and image
- **Full open duplex operation** means no clipping of speech or manual control of speech path
- **Self-testing**, ensuring the system **stays fully functioning**
- High performance system with simple adjustable amplifier
- A hearing loop is provided as standard to perfect the listening experience for everyone
- **Unobtrusive** and **easy to install**
- Staff can be **heard clearly**
- More **engaging experience** for customers
- Transactions made simple and enjoyable
